

RC SYSTEMS RECEIVES ISO 9001:2015 CERTIFICATION

FOR IMMEDIATE RELEASE

RC SYSTEMS CO., INC. RECEIVES ISO 9001:20015 CERTIFICATION

Hitchcock, TX 11-20-17, RC Systems an industry leader in Gas Detection is pleased to announce today that it has earned recertification for ISO 9001:2015 in management systems for design, manufacturing, and sales of electronic instrumentation. The comprehensive system audits covered every aspect of operations.

The International Organization for Standardization (ISO) 9001:2015 is the most updated standard of its kind and focuses on quality management systems and performance. It assists companies in developing a management system that aligns quality with their wider business strategy. There is a focus on risk-based thinking, process improvement and accountability in all organizational processes that helps improve communications, efficiency, reliability, and implementation of continuous improvement.

“Our decision to update to the ISO 9001:2015 standard exhibits our devotion to continually improving our processes and bettering our company as a whole,” said President, Roger Carter. “Having our ISO 9001:2015 certification demonstrates a level of commitment to customer focus and customer satisfaction above our competitors.”

About RC Systems
